CJC 1295

What is CJC-1295?

CJC-1295 is an incredibly effective growth hormone and works by causing another substance to be secreted. It stimulates the release of your own body's growth hormone which. Research shows that after the age of 30 the body's growth hormone level drops quickly and approximately 15% every 10 years. CJC-1295 is able to increase growth hormone naturally by binding to receptors for growth hormone releasing hormone (GHRH) on your brain and more specifically the pituitary gland. By doing this it triggers the brain to release growth hormone that would have otherwise been lost with age.

Indications

- Increase bone density
- Strengthen the cardiovascular system
- Increase muscle mass
- Improve ability to burn fat
- Improve recovery and repair from injuries
- Regenerate nerve tissues
- Strengthen the immune system
- Improve memory

What you need to know

CJC 1295 should not be used while pregnant or breastfeeding. Always tell your physician about all medications and supplements, especially corticosteroids and thyroid medications, that you are taking. Common side effects of CJC 1295 include reactions at the injection site, such as pain, redness or swelling along with flushing of the face; and less than 1 percent of patients report dizziness, headache or hyperactivity.

INCREASE BONE DENSITY

IMPROVE MEMORY
