AOD-9604

What is AOD-9604?

AOD-9604 is a synthetic analog of the human growth hormone developed to combat obesity and help people trying to lose weight. AOD-9604 stimulates the pituitary gland similar to HGH and other growth hormones to speed up the metabolism and increase weight loss in a shorter period of time than just diet and exercise alone.

Why would I want to use AOD-9604?

- Body fat reduction
- Imitates the way natural growth hormone regulates fat metabolism
- Prohibits the transformation of non-fatty foods into body fat
- Mobilizes stored energy during fasting or exercise
- Does not affect blood sugar
- Reduces abdominal fat
- Possesses regenerative properties associated with growth hormone

What you need to know:

AOD-9604 has no known risks associated with use.

Indications:

- Reduces body fat
- Increases metabolism

PATIENT BENEFIT:

FAT BURN

METABOLISM
