

BPC-157

Patient Education

What is BPC-157?

BPC 157 is a partial sequence of body protection compound (BPC) found in human gastric juice.

- BPC 157 can be used to accelerate healing of a variety of wounds including tendon-to-bone healing and healing of damaged ligaments.
- Acts systematically in the digestive tract to combat leaky gut, IBS, gastrointestinal cramps, and Crohn's disease.
- Protects and prevents gastric ulcers
- Can be used to protect liver from toxic damage (alcohol, antibiotics, etc.)
- Promotes healing of traumatic brain injury (TBI).

What Forms of BPC - 157 are Available?

BPC 157 is available as a subcutaneous injection and as an oral capsule

HOW DOES BPC-157 WORK?

- In response to tendon and ligament injury, BPC-157 accelerates healing by increasing type 1 collagen in these tissues.
- BPC-157 is cytoprotective and thus helps maintain the mucosal lining of the GI tract.
- - As an anti-inflammatory, it aids in the protection and healing of inflamed intestinal tissues.
- BPC-157 also aids in tissue damage repair by increasing blood flow to damaged tissues.
- Additionally, BPC 157 acts as a neuroprotective by modulating serotonin and dopamine production in the brain.

Why Would I want to Use BPC-157?

Based on the literature, BPC-157 has been shown to:

- Improves **healing** of many types of wounds
- **Protects** intestinal organs and **prevents stomach ulcers**
- Combats **leaky gut, IBS, gastro-intestinal cramps** and **Crohn's disease**
- **Accelerates healing** of **skin burns**
- **Protects and promotes healing of liver due to toxic stress.**
- Works as **an anti-inflammatory**
- Maintains integrity of **mucosal lining GI tract**
- Repairs tissues of **GIT, tendons, ligaments, brain, bone, etc.**
- Improves **digestive function**

Benefits for patients on BPC-157:

Improves Healing of Wounds

Repairs Brain Tissue

Improves Gut Related Issues

Repairs Bone Tissue

Healing of Liver

What You Need To Know

BPC 157 is a stable gastric peptide and has been found as a safe treatment for inflammatory bowel disease,
ligament wounds and tendon-to-bone wounds. It is stable in human gastric juice and has no reported toxicity.
