CEREBROGEN

What is CerebroGen?

CerebroGen is a porcine-derived cerebroactive peptide complex composed of a standardized blend of bioactive peptides extracted from porcine brain tissue through enzymatic hydrolysis. It is designed to support brain health by enhancing memory, focus, and overall cognitive function. Following the same neurotrophic principles as established therapies like Cerebrolysin, CerebroGen may promote neuroregeneration and aid in repairing neural pathways. This oral peptide formulation offers a practical and non-invasive option for individuals seeking to maintain cognitive wellness, support mental clarity, and help mitigate age-related cognitive decline.

What is CerebroGen's dosage?

CerebroGen comes in 100 mg capsules. Take 1 capsule daily.

Why would I use CerebroGen?

If you experience age-related memory loss, difficulty concentrating, mental fatigue, cognitive decline from stress or poor sleep, post-stroke recovery, or want long-term brain health support.

Indications:

- Supports memory, focus, and mental clarity
- Promotes the brain's natural processes of regeneration and synaptic repair
- Brain recovery after injury or neurological stress
- General cognitive performance in aging adults
- Helps reduce neuroinflammation and protect against oxidative stress

PATIENT BENEFIT:

IMPROVE BRAIN
